

Erasmus+

ONLINE LANGUAGE SUPPORT - OLS

Online language support is designed for participants of Erasmus+ and other European programs, with the aim of improving their knowledge of the language in which they are studying, working or volunteering abroad, so that they can get the most out of this experience.

The OLS (Online Language Support) operates through the EU Academy platform, where it offers a range of interactive and engaging language learning activities that help you learn a new language or master a language the basics of which you already know. The platform is adapted to the needs of each individual, so everyone has a unique learning experience. Whether it's learning the basics of French or mastering German, it is you, that choose the level and time of study that suits you.

OLS is intended for students who participate in mobility for a duration of 14 or more days and will use one of the languages available in the online language support tool as their main language of teaching or work (except for native speakers). The online assessment (if available) is to be completed prior to the start of the mobility period.

After you have been selected to participate in Erasmus+ mobility, the University of Primorska will send you further instructions regarding the possibility of participation, though using the new OLS itself is very easy. Before the mobility, the student completes online assessment of language skills and, if necessary/desired, additionally follows short online language courses.
