

OVERVIEW OF ABBREVIATIONS used in the course schedule of the spring term 2018/2019

1. Abbreviations for STUDY PROGRAMMES

Abbreviation	Study programme
<i>Undergraduate study programmes</i>	
MA	Mathematics (in Slovene)
MA-EN	Mathematics (in English)
MF	Mathematics in Economics and Finance
RIN	Computer Science (in Slovene)
RIN-EN	Computer Science (in English)
BF	Bioinformatics (in Slovene)
BF-EN	Bioinformatics (in English)
BI	Biodiversity / Conservation Biology
SK	Mediterranean Agriculture
BP	Biopsychology
<i>Master's study programmes</i>	
PMA	Mathematical Sciences (in Slovene)
PMA-EN	Mathematical Sciences (in English)
PRIN	Computer Science
PBI	Nature Conservation
PMF	Mathematics with Financial Engineering
PBP	Biopsychology
UPSI	Applied Psychology
<i>Other</i>	
PDM	Psychological Differential Module

2. Abbreviations for some COURSES

In the schedule below, the names of most are written out in full. We shortened the name if:

- the course is implemented in several study programmes under different names;
- the course is compulsory in some study programmes and elective in others.

Abbreviation	Course name	Study programme
Algebra-II	Algebra II - Linear Algebra	MA, MF- compulsory
	Mathematics III - Algebra II	RIN- compulsory
Algebra-II EN	Algebra II - Linear Algebra EN	MA-EN- compulsory
	Mathematics III - Algebra II EN	RIN-EN- compulsory
Discrete-Mathematics-II	Discrete Mathematics II - Combinatorics	MA, MF- compulsory
	Mathematics IV - Combinatorics with Graph Theory	RIN- compulsory
Discrete-Mathematics-II EN	Discrete Mathematics II - Combinatorics EN	MA-EN- compulsory
	Mathematics IV - Combinatorics with Graph Theory EN	RIN-EN- compulsory
GIS	Geographic Information Systems	RIN- compulsory
	GIS and Introduction to Thematic Cartography	BI- compulsory

Abbreviation	Course name	Study programme
Physical-Chemistry	Physical Chemistry with Cheminformatics	BF- compulsory (2nd year)
	Physical Chemistry	BF- compulsory (3rd year)
MVAJ	Mathematical Topics in English I / Mathematical Topics in English I EN	MA, MF, MA-EN- compulsory
	Mathematical Topics in English II / Mathematical Topics in English II EN	MA-EN- compulsory
Programming-II EN	Computer Science II EN	MA-EN- compulsory
	Programming II - Concepts of Programming Languages EN	RIN-EN, BF-EN- compulsory
Programming-II	Computer Science II	MF- compulsory
	Programming II - Concepts of Programming Languages	RIN- compulsory, BF- compulsory
Com-Pract	Computer Practicum	MA, MF- compulsory
	Introduction to Computer Science	BI- compulsory
School-Psych	School Psychology	UPSI- compulsory
	School Psychology	PBP- elective
Game-Theory	Game Theory	MF- compulsory
	Game Theory in Biopsychology	BP- compulsory
Introd-Microbiology	Introduction to Microbiology	BI- compulsory (1st year), BI- elective (2nd and 3rd year)

3. Abbreviations for GROUPS (for undergraduate study programmes)

The course schedule also includes information about the group(s) of students attending the course.

A group can be the MAIN GROUP or one of its SUB-GROUPS.

The **main group** includes all students from a certain year of study in the study programme. Its abbreviated name consists of the abbreviation of the study programme (for example: MA, RIN, BF...) and the year of study (1, 2, 3). An example of the main group: MA3 = 3rd year of the undergraduate study programme Mathematics.

The main group can be divided into **sub-groups** if:

- the students of the same year of study in the study programme are divided into more group at seminars (SE), tutorials (SV) or laboratory work (LV). An example: »RIN1-1skup« = students of the 1st year of study in the undergraduate study programme Computer Science who are included in the 1st group; groups are listed under a) below;
- the sub-groups of the main group are also **elective courses**, as they are attended only by the students who have chosen the course. An example: »BI2-BVAJ« = students of the 2nd year of study in the undergraduate study programme Biodiversity who have chosen the elective course Biological Topics in English.

a) COMPULSORY courses

If students are divided into groups for seminar sessions (SE), tutorials (SV) or laboratory work (LV), the courses are marked with the main group (BP1, RIN 2, BI3, etc.) and its sub-groups.

The list of the courses and programmes for which the division of students into groups is necessary for seminars (SE), tutorials (SV) or laboratory work (LV) is available on our website (<https://www.famnit.upr.si/en/student-pages/timetables>) in the document "Students by groups".

b) ELECTIVE courses

The sub-groups for elective courses are marked as follows: the main group is listed first (BI1, BF2, etc.), followed by the abbreviation for the elective course (e.g., BI1-BVAJ).
