

TRANSFORM4EUROPE WEEK AT THE UNIVERSITY OF TRIESTE

TRIESTE, 5TH -9TH JUNE 2023

We invite BA, MA, and PhD students, administrative and academic staff of the whole Transform4Europe Alliance to take part in the Transform4Europe Week at the University of Trieste. The main topic of the event is "Transborder Europe".

**UNIVERSITÀ
DEGLI STUDI
DI TRIESTE**

**TRANSFORM
4EUROPE**

DIDACTIC STREAM

Our didactic stream includes different courses and workshops, each focusing on different aspects of "Transborder Europe": from entrepreneurship to public history, from exploring our territory to environmental constitutionalism, participants will have the opportunity to learn and experience a real transborder atmosphere.

1. Workshop: Cultural Differences in Global Communication

The workshop on global communications and advertising aims to explore the challenges and opportunities associated with creating effective advertising campaigns that appeal to audiences from different cultural backgrounds and regions of the world. The workshop covers the challenges and opportunities of global communications, cultural influences on advertising, and practical considerations in designing communications campaigns. Participants will have the opportunity to share their own experiences and insights, as well as learn and engage in group discussions and exercises. By the end of the workshop, attendees will gain an understanding of the complexity of global communications and advertising and practical tools and techniques to create more effective and culture-relevant campaigns.

Lecturer: Dr. Yuliia Kyrdoda

Participants: max. 15

Target group: MA students

ECTS: no - a participation certificate will be issued

Mode: Face-to-face

When: 5th June, 14:30 - 16:30

2. Module name: Public History in a Transborder Area

How to deal with conflictual and divided memories. The main aim of the course is to deal with the main topics of contemporary history in a border area, especially related to the wars that ravaged our Continent throughout the 20th century. The scourges of war have produced divided and conflicting memories within the population and left tangible traces on the territory. After a general introduction to the history of the Upper Adriatic border area during the 20th century, which will take place online before the T4EU week in Trieste, the course will focus, in a transnational methodological perspective, on some examples of history dissemination through the analysis of monuments and museums in our cross-border area. These will provide perfect examples of how memories can be celebrated and represented. Students will visit museums in Trieste, Gorizia, Nova Gorica (SLO) and the Natisone valleys together with Prof. Catalan and Dr Alessandro Carrieri, an expert in Digital Public Humanities. These visits will be real workshops and will require students to play an active role. The results of their work will be used for the final restitution of the course, which will take place on Friday, 9th June.

Lecturer: Prof. Tullia Catalan, Dr. Alessandro Carrieri

Participants: min.10; max. 20.

Target group: BA and MA students

ECTS: 3

Mode: hybrid (2 hours online before the T4EU week begins, remaining hours: face to face)

When: whole week, 5th - 9th June

3. Module name: Geographic Information Systems for ecological and economical studies

This module is mainly for students who chose "Geographic Information System for Ecological and Economical Studies" among the BA tracks courses offered by the University of Trieste. It includes online and face-to-face lessons. Nine hours will be taught in person during our T4EU week (5th - 9th June).

The primary goal of the module is to educate students in Geographic Information Systems (GIS), providing opportunities to analyze data, explore issues, problem solve, and evaluate situations in a geographic and spatial context. Specific examples will be devoted to the analysis of ecological and economic problems and how to propose practical solutions for their optimization and solution, through GIS analyses.

Learning outcomes:

Students will acquire the basics of GIS and will use GIS to:

- Explore mapped data,
- Relate GIS with remote sensing technologies,
- Analyze spatial data, using GIS analysis tools,
- Manage geodatabases,
- Create maps, images and apps to communicate spatial data in a meaningful way to others. At the end of the module, students will be able to perform targeted GIS operations on case studies concerning ecology and economics.

Lecturers: Prof. Giovanni Bacaro, Prof. Giuseppe Borruso

Participants: min.5, max. 25.

Target group: BA and MA students

ECTS: 3

Mode: hybrid (online and face-to-face)

When: 6th, 7th, 8th June

4. Workshop: Environmental and Climate Constitutionalism(s) and Political Challenges

As a result of the Anthropocene's global socio-ecological crisis, constitutional systems had to cope with the impact of environmental degradation and anthropogenic climate change (ACC). Currently, environmental provisions within 153 (out of 193) constitutions of the United Nations' member states evidence an increasing trend in recognising environmental rights and duties, along with other provisions devoted to the management of natural resources, private property, the allotment of powers in federal and regional states. In reference to climate change, to date, several constitutions mention the concept 'climate', mainly regarding land use and state policy, while some of them expressly refer to 'climate change' (as in the case of Ecuador, Vietnam, Dominican Republic, Zambia, Thailand, and Cuba) and even to adaptation and mitigation as core-actions to cope with ACC. The effects of global warming, if not addressed cooperatively and comprehensively, exacerbate natural resource disputes by generating complex socio-political fallout. From piracy (Somalia) to religious-based terrorism (Mali, Burkina Faso) and inter-state disputes (Sudan-Ethiopia) to revolutions (Syria), these are all challenges to international security and global stability intertwined with climate change. In critically addressing the aforementioned considerations through an interdisciplinary methodology, seminars will focus on environmental and climate issues within four specific grounds:

1) Environmental and climate constitutionalism(s), 2) Climate justice and litigation, 3) The management of water resources, 4) Climate change, international security, political stability.

Lecturers: Prof. Pasquale Viola, Prof. Federico Donelli, Prof. Roberto Louvin

Participants: min.7, max. 21

Target group: BA and MA students

ECTS: no-participation certificate will be issued

Mode: face-to-face

When: 7th and 8th June

5. Bridging the gap between stakeholders through students' commitment within the T4EU Alliance

In developing a transnational stakeholder network within the T4EU Alliance, the role of student trainees in exploring opportunities and analysing critical issues can be crucial. However, their role in stakeholder engagement depends on several multifaceted factors, which have as much to do with the "productive" needs of stakeholders, as with the educational goals and expectations of students.

Some questions thus arise that may help create a basis for discussion:

1. What critical issues arise when building a relationship that allows stakeholders to create added value and students to acquire employable skills?

2. What tools can be put in place to strengthen this relationship?

This workshop aims to bridge the gap between stakeholder and student engagement within the T4EU Alliance. During the workshop, speakers will identify channels to create connections between different stakeholders working in the same field of expertise across the Alliance, improve networking and cooperation between those involved, and share best practices."

Lecturer: Dr. Alessandro Carrieri

Participants: min. 8-10 (of which 5 stakeholders); max 20

Target group: BA, MA, PhD students, stakeholders from partner universities, general public

ECTS: no –an attendance certificate will be issued

When: 6th June, from 14:00 to 16:00

6. How unicorns arise: the key words, patterns and trends of innovation

Why is it getting harder and harder to make a "real" innovation? What is meant by "invention" and why do they not always change the world? What are the business processes that make a product or service a global success and what is the role of universities in all these processes? Starting with concrete examples, the seminar will provide the terminology and business tools to deeply understand the mechanisms at the heart of innovation.

Lecturer: Dr. Cristiano Piani

Target group: BA, MA students, administrative staff, professors

ECTS: no -an attendance certificate will be issued

When: 7th June

7. Module name: Visit Val Rosandra (Rosandra Valley)

Val Rosandra (EN: Rosandra Valley, SLO: Dolina Glinščice) is one of the most interesting bio topes of the Trieste Karst. The only example of surface hydrography in the Italian Karst, it consists of a deep canyon excavated by the Rosandra stream, which hosts a very rich and interesting flora (nearly 1,000 species). The excursion—almost entirely flat or downhill – will start from the small church of San Lorenzo along the edge of Monte Stena (with spectacular views of the valley below), and then descend to the small village of Botazzo, where we'll cross the Rosandra stream going down to Bagnoli along the left orographic side of the Canyon. During the excursion, stops will be made to observe the residues of dry grasslands, the dynamics of vegetation, the Karst oak forests, the colonization of rocks by cyanobacteria and lichens, the scree slopes rich in endemic plants, and the alder forest in the lower part of the valley. During some of these stops, the participants will try to identify plants using the interactive guides of the Dryades Project (University of Trieste) on their mobile phones, which are available in 5 languages (Italian, English, Slovenian, German and Spanish). Further info on Val Rosandra and its rich flora:

Italian: https://dryades.units.it/rosandra_it/,

Slovenian: https://dryades.units.it/rosandra_si/

English: https://dryades.units.it/rosandra_en/

German: https://dryades.units.it/rosandra_de/

NB: to attend this module, students are required to wear comfortable clothes and hiking shoes or trainers.

Lecturer: Prof. Pierluigi Nimis

Participants: max 20

Target group: BA and MA students

ECTS:1

Mode: face-to-face

When: 7th June

8. Module name: Visit the WWF Marine Reserve and the BioMa Museum

What better way to visit a marine reserve than to dive into its protected waters to discover its rich biodiversity of habitats and species?

We are talking about snorkelling or surface fin swimming. From June to September every year, we can offer you the opportunity to dive into our protected marine Area, to observe the hundreds of species of marine animals and plants that populate it. In small groups, accompanied by the WWF staff you will be able to swim among the schools of dream fish (*Sarpa salpa*), white sea bream and damselfish (*Chromis chromis*). Thanks to the skill and experience of the WWF guides, you may come across the rarest brown meagre (or corb), or be able to spot sea creatures that might otherwise escape more inexperienced eyes, such as blennies, nudibranchs, sponges, anemones and many others.

NB: to visit the marine reserve, participants need to be equipped with their own snorkels and masks. Wetsuits and fins will be provided by the WWF staff.

More information available at <https://www.ampmiramare.it/en/seawatching-en/>

The BioMa is an environmental study centre designed to offer you a truly immersive experience. It is open all year round and contains all the varied environments of the Gulf of Trieste and the Miramare Marine Protected Area. There are reconstructions of the submerged reef, sections of sandy and muddy sediment with their inhabitants, dioramas of sea grasslands, sunfish, bottle nose dolphins and other pelagic life-size animals. There are also immersive videos and 3D.

Participants: max 24 per day (7th and 8th June)

Lecturers: WWF guides

ECTS: no –an attendance certificate will be issued

Mode: Face-to-face

When: 7th and 8th June

This activity will be organised twice during our T4EU week: on the 7th and on the 8th of June, from about 2pm to 6pm.

ADMINISTRATIVE STREAM

Our T4EU week includes a workshop for the administrative staff of the T4EU Alliance and a visit to an almost unknown part of our campus, the "Parco di San Giovanni" (<http://www.parcodisangiovanni.it>)

Up to 2 staff members from partner universities are welcome to take part in our Administrative stream.

1. Workshop: Accessible Communication: theory and practice in a European perspective

This workshop will deal with accessible communication with a focus on writing. Participants from different countries will have the chance to discuss accessibility experiences, policies, and practices in their countries and institutions. They will later be given a linguistic perspective on accessible writing, with some guidelines to write easy-to-read texts for public communication. Finally, in the practical part of the workshop, participants will work in small groups to draft an accessible text.

Lecturer: Dr. Floriana Carlotta Sciumbata

Participants: min.4, max 20

Target group: administrative staff

Certificate available: yes

Mode: face-to-face

When: 8th June

2. How unicorns arise: the key words, the patterns and the trends of the innovation

Why is it getting harder and harder to make a "real" innovation? What is meant by "invention" and why do they not always change the world? What are the business processes that make a product or service a global success and what is the role of universities in all these processes? Starting with concrete examples, the seminar will provide the terminology and business tools to deeply understand the mechanisms at the heart of innovation.

Lecturer: Dr. Cristiano Piani

Target group: BA, MA students, administrative staff, professors

Certificate: attendance certificate will be provided to all participants

When: 7th June

3. Visit the "Parco di San Giovanni" (San Giovanni Park)

In the 1970s, the park became a place of innovation and change. Here, Franco Basaglia and his co-workers sparked a revolution of international outreach in the field of psychiatry.

The hospital and the park were opened to the city: patients were free to leave and city residents were free to enter.

Today, the park and city shine as a meeting place of social enterprises, welfare and creative activities, cultural projects and higher education—a place where ideas are exchanged, a symbolic place where new ways of "using" the city can be tested amidst splendid architecture, paths, flights of steps, thickets, majestic oaks, lawns and flowerbeds of roses and camellia.

Lecturer: Prof. Umberto Albert
Participants: min.4, max 20
Target group: administrative staff
Certificate available: yes
Mode: face-to-face
When: 8th June

PARALLEL EVENTS

THE MANAGEMENT OF INNOVATION CONFERENCE-MIC 2023 (FOR PHD STUDENTS ONLY)

The 22nd edition of the Management and Innovation Conference - MIC 2023 will take place at the University of Trieste from 7th to 10th June 2023, on the same days as our T4EU week.

A call for papers and an invitation to participate in the MIC 2023 edition was sent to all partners last February. But on 7th and 8th June some of the MIC events will also open to our T4EU Alliance free of charge!

WHAT IS MIC?

MIC aims at shedding light on a green, digital, and inclusive society. Eight billion people have inhabited the Earth since November 2022. Earth's population is confronted with global warming, the war in Ukraine is at the forefront of Europe, and poverty marks many parts of the world. It is a task and duty of the academic community to discuss the future developments at micro and macro levels. Scenarios for the future of humanity are not fixed and unavoidable. There are many ways to work towards a future that is green, digital, and inclusive. This 'trinity' of key concepts for humanity is not sufficient but obviously a required condition for future life.

To see the full programme: MIC - Programme
(<https://www.mic.fm-kp.si/programme>)

MIC EVENTS OPEN TO THE T4EU ALLIANCE

1. Workshop on quantitative research: Measuring Illicit Financial Flows– Profit Shifting by Multinational Enterprises (Case Study)

The workshop will present participants with the process of developing methodological guidelines for the measurement of a particular topic, in this case study the profit shifting by multinational enterprise groups (MNEs). This starts with providing a conceptual framework for the measurement of the topic, addressing relevant definitional aspects that dictate further methodological work: not merely methodology to be applied, but also (and above all) data sources. Participants will explore the methodological considerations in proposing a methodology for statistical measurement of the phenomenon, but also partake in the practical exercise of collecting pub-method to compile preliminary statistics and evaluate the methodological relevance of the data sources, methods and results. Dr Bojan Nastav is an acting Chief of Statistical Analysis at the United Nations Conference on Trade and Development (UNCTAD). His work evolves around methodological guidance for measuring tax and commercial illicit financial flows. In the past, he has worked as a researcher at the University of Primorska (Slovenia), focusing on statistical and economic analysis of the phenomenon of the shadow economy. He then worked as a statistician at UN Statistics Division and UNCTAD, and more recently as a director general of the national statistical office of Slovenia.

Facilitator: Dr Bojan Nastav

Target group: PhD students

When: 7th June from 11:30 to 13:00

2. Workshop on Qualitative Methodology: Getting Started with Text Analysis

Researchers, marketers and consumers swim in a sea of language, and more and more of that language is recorded in the form of text. Text is indeed produced by organizations through reports, ads, social media posts and website copy as well as by consumers through word of mouth, complaints, and status updates. Despite the unstructured nature of this kind of data, texts can be coded and analyzed in order to test the relationship between or among the constructs or variables of interest, creating vast opportunities for researchers.

This workshop will introduce the basic skills of text analysis. We will begin by reviewing the theoretical perspectives important for studying the text. We will then cover automated text analysis techniques, primarily dictionary-based analysis, by showing the steps needed to answer a range of management questions by means of real examples. The workshop will conclude with a Q&A session.

Dr Annamaria Tuan is a Senior Assistant Professor of Marketing at the Department of Management of the University of Bologna. Her research interests focus on the intersection between Corporate Social Responsibility communication and Social Media Marketing with a focus on text analysis. She has published in various marketing and management journals including the Journal of Management Studies, the Journal of Interactive Marketing, Psychology and Marketing, and the Journal of Business Ethics.

Facilitator: Dr Annamaria Tuan

Target group: PhD students

When: 7th June from 14:15 to 15:45

3. Hackathon

More information on this activity will be available soon.

Facilitator: Prof. Guido Bortoluzzi

Target group: PhD students

When: 7th June from 16:00 to 18:00

4. Social activity: MIC aperitive master class

Do you enjoy socializing in front of a good ice-cold drink and something to nibble? Learn the art of a real Italian aperitivo at this dedicated masterclass! Participation fee is €10,00. More information will be available over the next weeks.

Target group: PhD students

When: 7th June

5. Workshop: Artificial Intelligence and Higher Education. A Critical Studies Approach

Artificial Intelligence (AI) is frequently hailed as a 'solution' to many of education's core problems (e.g., OECD, 2021) –problems such as student underachievement, assessment at scale, and better preparing learners for 21st-century career paths. However, such claims tend to be aspirational rather than evidence-based (Miao & Holmes, 2021), and overly simplistic, forgetting issues such as agency, pedagogy, surveillance, human rights, and ethics (Holmes et al., 2021; Holmes et al., 2022; Holmes & Porayska-Pomsta, 2022; Porayska-Pomsta, Holmes and Nemorin, in press). In fact, current applications of AI in Higher Education tend to be solutions-rather than problems-oriented, and all too often undermine student agency and disempower educators; while the teaching of AI almost always focuses on the technological dimension of AI to the exclusion of the human dimension (its ethical, human, and social implications). Accordingly, this presentation will explore the application and teaching of Artificial Intelligence in Higher Education from critical studies and human rights perspectives. It will identify and address many of the key myths, it will explore the elephant in the room (ChatGPT and similar tools), it will argue for a new trajectory, and it will pose more questions about AI and the future of learning than answer.

Key-note speaker: Dr Wayne Holmes, Ass. Prof. at the UCL Knowledge Lab at University College London, UK

Target group: PhD students

When: 8th June from 12:00 to 13:30

6. Student Council Meeting

The Student Council meeting of the Transtorm4Europe Alliance will be held in Trieste on 5th June.

Participants: approx. 50

Target group: students

When: 5th June

7. WP5 – Business Plan Competition Award

This year's international Business Plan Competition (BPC) will focus on the topic "Sustainability" that is one of T4EU project priorities that address the current societal challenges.

Sustainability means "something that aims to fulfil the needs of current generations without compromising the needs of future generations, while ensuring a balance between economic growth, environmental care and social well-being".

The final event of the T4EU Business Plan Competition will be held in hybrid mode. During this event, the 7 selected projects will be presented by the students and the winning project will be awarded €500 and the possibility to attend the 2nd Entrepreneurial School that will be held at the University of Silesia in Katowice (Poland) in September 2023.

The final event of the T4EU Business Plan Competition will be open to the general public and will represent a unique opportunity to see how students developed their business plan.

Participants: max

50 Target group: all

When: 7th June

8. WP5 – Open Dual Lecture ¹¹ "Mobility and decarbonisation: the EU's challenges for 2035"

The constant and fruitful dialogue between economic players and academia is absolutely necessary. It involves the development of a common language founded on mutual knowledge of production processes and models based on tools that both sides may jointly master.

To foster this dialogue, the University of Trieste, as a partner of Transform4Europe project, organises Open Dual Lecture to reach two goals: make it clear that the problem is the same from both the academic and the industrial/business perspectives, and share a common language about the most important topics of the future.

Two speakers, one academic and an entrepreneur will be invited to dialogue about the three focus areas of the Transform4Europe project:

- digital transformation and smart regions;
- environmental transformation and sustainability;
- societal transformation, community building and inclusion.

Key note speakers: Prof. Rodolfo Taccani

Participants: max 50

Target group: BA and MA students, academic and administrative staff

When: 7th June

9. WP5 – International Visiting Lectureship – Key factors for a start-up scalability

The Alliance wants to foster the set-up of new innovative companies with the "role mode approach": an entrepreneur or a practitioner, coming from another European region, will present his experience and will try to inspire the students, the academics and the citizens with his (entrepreneurial) knowledge and passion.

Participants: max 50

Target group: BA and MA students, academics, administrative staff, general public

When: 8th June: from 15:00 to 16:30 (for students) from 17:00 to 18:30 (administrative staff and general public) 9th June: from 10:00 to 11:30 (for academics)

10. Transborder Europe – Round table organized by students

At the end of the Transform4Europe Week on Transborder Europe, the students of Units would like to invite you to an open round table on its guiding topic, with reflections also on the situation and History of Trieste and Gorizia at the border with Slovenia.

The round table will host students, academic and administrative staff from all partner universities to wrap up and discuss the discoveries and impressions of the activities and seminars of the week, but also to share personal experience with European borders, and their trespassing.

For each round of discussion, we would like to invite guests to make up the panel, and then have a panel of students picked among the audience to share their previous experience of European borders and what they found out during the week and have an open discussion on what has been just shared. Students from the University of Trieste will moderate the panels.

Furthermore, since multilingualism is at the core of the T4EU Alliance and is a crucial topic for European institutions and the European Student Assembly, we would like to raise awareness on the importance of a knowledge-based, entrepreneurial profession learnt and taught at several partner universities: the conference interpreter. Two students, specializing in conference interpreting, from the University of Alicante and the University of Sofia will be selected, along with conference interpreting students at the University of Trieste, to take part in the T4EU Week at Units and interpret at the closing round table, enabling the public to speak and follow the conference in one of the following languages: English, Spanish, Bulgarian, Italian, German.

Participants: all

Target group: all

When: 9th June, 9:00 – 12:00

CULTURAL AND SOCIAL STREAM

1. Welcome coffee and plenary session

Our Vice-Rectors Prof. Valter Sergo, our Vice-Rector for T4EU, prof. Alberto Pallavicini will welcome guest students and staff. Local authorities (TBC) will take part in the event and deliver a welcome speech on the importance of European Alliance and cultural exchange.

Participants: all

Target group: all

When: 5th June, 10:00 – 12:00

2. Welcome pizza

Enjoy the taste of real Italian pizza!

Participants: all

Target group: all

When: 5th June from 19:30 at Pizzeria Da Pino <https://www.dapino.it/2020/08/26/da-pi-no-trieste/>

3. Trieste guided tour

A unique atmosphere can be felt in Trieste, as a border town, a melting pot of at least three cultures: Latin, Slavic and German.

It has a retro flavour of its own, between historic literary cafés and monuments from the past as an important city of the Habsburg Empire. Trieste is the ideal destination for those who love locations rich in a complex and troubled history that has bewitched, harboured, and nurtured writers and other intellectuals. The environment is diverse, with an international outlook. A place to be experienced at least once in a lifetime.

Participants: all

Target group: all

When: 6th June (TBC), from 15:30 to 17:00

4. Gender equality and the fight against discriminations: Round Table on the Role of the Single Guarantee Committee (CUG).

Details on this activity will be available over the next weeks.

Participants: max

50 Target group: all

When: 6th June, from 15:00 to 17:00 (TBC)

5. Jazz concert

Students of the Trieste Music Academy (Conservatorio Tartini <https://conts.it/>) will play a live jazz concert for participants in the T4EU week.

Participants: all

Target group: all

When: 6th June at 18:30, (TBC)

6. Yoga therapy

Details on this activity will be available over the next weeks.

Participants: max

50 Target group: all

When: 7th June, 17:30 – 19:00

7. Visit Miramare Castle and Park

A castle, a story, an empire. A historic residence with all its original furnishings. An eclectic collection that brings together works and styles from around the world. The Castle was built for Maximilian, who fell in love with the view of the small bay and decided to build his home here, where he lived with his wife, Charlotte of Belgium. Maximilian and Charlotte were able to enjoy their beautiful castle for only four years before leaving for Mexico, where Maximilian was crowned Emperor Maximilian of Mexico, only to be executed by a firing squad in 1867. Legend has it that Charlotte, mad with grief, still wanders in the park calling his name.

Participants: all

Target group: all

When: 7th June, 17:30 – 19:00 (TBC)

OPTIONAL SOCIAL ACTIVITIES ORGANISED BY ERASMUS STUDENT NETWORK, FOR STUDENTS AND STAFF

1. Early bird campus tour

Students from our Erasmus Student Network (ESN) would love to get you know better and make your T4EU week an unforgettable experience! To start with, they will take you for a quick campus tour on Monday morning, 5th June, just before our T4EU week officially takes off! This activity has been organised by our Erasmus Student Network (ESN).

Participants:

all Target

group: all

When: 5th June, 9:30 – 10:00

2. Orienteering

This activity has been organised by our Erasmus Student Network (ESN).

Participants: max 20 Target

group: students

When: 5th June, 16:30 – 18:00

3. Chill night

Enjoy the view of the sunset by the sea in the company of students from the whole T4EU Alliance. This activity has been organised by our Erasmus Student Network (ESN).

Participants: all

Target group: students

When: 7th June, from 19:30

4. Sport event

Five-a-side football, volleyball and basket. This activity has been organised by our Erasmus Student Network (ESN).

Participants: max 20

Target group: students

When: 8th June, 16:30 – 19:00

5. A walk into the past: visit the kleine Berlin

Kleine Berlin (max 10 participants) – The Kleine Berlin is a group of tunnels built by the German army during the Second World War. The air-raid shelter is made up of a public air-raid tunnel for civilians and of a German military air-raid shelter, consisting of a main tunnel and side branches.

Inside the Kleine Berlin complex everything has remained as it was: the walls, for instance, still feature paintings dating back to over sixty years ago.

<https://www.turismofvg.it/monuments-and-historical-sites/kleine-berlin?LangSetCMS=en>

This activity has been organised by our Erasmus Student Network (ESN).

Participants: max 20

Target group: MA, BA, and PhD students

When: 8th June, 18:00 – 19:30
